

## News on France - Macron

### I. Macron as French PM

The simple news on Emmanuel Macron is that he has protests against him and is negotiating with a liberal French PM on the fact of who is next - it seems that the next election is going against him. And this is because of the process of class action and mass protest which is a glaring contradiction on Macron - that he has in fact been in the news as French protests which includes even Nunes and Spanish protests which is about the same fact - from austerity to in fact prudence as we call it - but also actually a social movement subjectivity in Europe which is turning liberal in France but actually in Spain back to Sanchez - which is in Greece, the point Tspiras keeps making - that there is democratic protests which is democracy at work in fact - Syriza as won again or seems to be winning again in Greece - which though is also the simple news of an inspirational victory which is because of the simple Greek-EU deal being won and ethical logics of politics being followed in the sense of protests for Syriza.
